

## Understanding Websense® Essentials for Administrators

### Course Description

*Understanding Websense Essentials* provides participants with the tools to deploy, configure, and maintain web filtering and protocol management features in Websense Enterprise® or Websense Web Security Suite™.

### Who Should Attend

This course is designed for network or system administrators responsible for the deployment and maintenance of Websense Enterprise or Websense Web Security Suite.

### Length of Class

The course consists of a four-hour live web-based session conducted by a certified Websense professional.

### Size of Class

Each session offers private training for members of your organization. Class size is based on the number of participants that you wish to invite, with the following suggested limits: a small group of up to 10 individuals is recommended, although sessions can accommodate up to 20 participants.

### Schedule

Sessions are scheduled based upon your team's availability.

Note: Pricing is based per session, regardless of the number of participants.

## what you will learn

### Websense Essentials:

- Understand which Websense web filtering components are necessary in your environment
- Configure web filtering policies based on criteria such as content, bandwidth usage, and time of day
- Configure filtering of non-HTTP protocols based on criteria such as bandwidth usage and time of day
- Implement policies by user and group
- Configure central policy distribution
- Integrate your Websense web filtering solution with at least one directory service
- Configure manual or transparent identification of users
- Deploy a Network Agent for protocol and bandwidth awareness
- Perform basic troubleshooting for Websense Enterprise or Websense Web Security Suite

## Understanding Websense® Reporting Tools for Administrators

### Course Description

*Understanding Websense Reporting Tools* provides participants with the knowledge and skills necessary to report on internet traffic using Websense Enterprise® Reporter. Log configuration, report scheduling, and database management are also covered.

### Who Should Attend

This course is designed for network or system administrators responsible for the deployment and maintenance of Websense reporting tools.

### Length of Class

The course consists of a four-hour live web-based session conducted by a certified Websense professional.

### Size of Class

Each session offers private training for members of your organization. Class size is based on the number of participants that you wish to invite, with the following suggested limits: a small group of up to 10 individuals is recommended, although sessions can accommodate up to 20 participants.

### Schedule

Sessions are scheduled based upon your team's availability.

Note: Pricing is based per session, regardless of the number of participants.

## what you will learn

### Websense Reporting Tools:

- Determine the best reporting tool for a specific situation
- Monitor current internet traffic using Websense Real-Time Analyzer™
- Generate custom reports using Websense Enterprise Reporter
- Perform forensic traffic analysis with Websense Enterprise Explorer
- Export reports and email them on a predefined schedule
- Configure logging parameters for performance and reporting depth
- Configure Websense software to perform database management activities, including archive and purge functions
- Integrate the Websense Enterprise reporting components with a SQL server (if appropriate)

For more information or to schedule training, contact your Websense Representative at 858.320.8000 or visit [www.websense.com](http://www.websense.com)

## Understanding Websense® Desktop Security for Administrators

### Course Description

*Understanding Websense Desktop Security* provides participants with the knowledge and skills necessary to filter and log desktop application usage with Websense Client Policy Manager™ and Websense Web Security Suite – Lockdown Edition™.

### Who Should Attend

This course is designed for network or system administrators responsible for the deployment and maintenance of Client Policy Manager or Websense Web Security Suite – Lockdown Edition.

### Length of Class

The course consists of a four-hour live web-based session conducted by a certified Websense professional.

### Size of Class

Each session offers private training for members of your organization. Class size is based on the number of participants that you wish to invite, with the following suggested limits: a small group of up to 10 individuals is recommended, although sessions can accommodate up to 20 participants.

### Schedule

Sessions are scheduled based upon your team's availability.

Note: Pricing is based per session, regardless of the number of participants.

## what you will learn

### Websense Desktop Security

- Determine the Websense Client Policy Manager™ components necessary for your environment
- Deploy Client Policy Manager to desktop and laptop computers
- Configure monitoring of desktop applications
- Perform hardware and software inventories on client machines
- Filter executables based on criteria such as user and workstation information
- Filter network access based on criteria such as port numbers and source application
- Block new threats immediately using an Outbreak Rule
- Create policies targeted at machines that frequently leave the network
- Configure usage rights for removable media devices
